Poulten & Graf Press release for Pittcon 2019

FORTUNA® OPTIMAT® 3 Dispensing station back in the program range of Poulten & Graf

The new design and the large touchscreen display show that the OPTIMAT® dispensing station has been completely revised. Above all, we focused on the operating comfort. The user can accurately and reliably carry out serial dispensing in volume ranges from 0.05 - 300 ml. Even aggressive liquids can be easily handled with the dosing pumps that are made out of high quality materials such as borosilicate glass and PTFE. The robust FORTUNA® OPTIMAT® 3 is perfectly suitable for continuous operation.
