FOR IMMEDIATE RELEASE

Argos Technologies Showcases the Latest in SFCA Filters and Transfer Pipets at Pittcon 2017

February 7, 2017, Vernon Hills, Ill. — Argos Technologies will introduce many one-of-a-kind products to the research community at Pittcon® 2017. Surfactant-free cellulose acetate (SFCA) filter membranes and disposable transfer pipets are two of the new products on display in the company's **booth #2336**.

Front and center at the show will be the new SFCA filter membranes. These bottletop filters have much lower extractables than standard cellulose acid (CA) membranes. The filters contain none of the wetting agents found in standard CA. These wetting agents have been shown to be toxic to specific cell lines in vitro (1-3). SFCA also has lower protein binding than does standard CA. Filters are ideal for separation, purification and sterilization of biological samples.

Also on exhibit will be Argos Technologies disposable transfer pipets. These pipets are manufactured from a custom-grade low-density polyethylene (LDPE), making them the perfect substitute for breakable glass pipettes. These one-piece molded pipets are disposable, therefore eliminating the risk of cross-contamination without compromising the quality and precision needed to create repeatable uniform drops.

The Argos Technologies team will be available at Pittcon from March 6 to 9, 2017. Be sure to stop at **booth #2336** and inquire about these and many of the other unique and popular products designed to make laboratory research more efficient and highly accurate.

Argos Technologies is a life science company that provides a comprehensive range of equipment and supplies to the laboratory research community across the globe. Since our company was founded in 2003, we have continued to develop and introduce unique and innovative products to the marketplace. Our product portfolio includes liquid handling, benchtop equipment, general laboratory consumables and cryogenic storage. We are committed to providing unique product and technological solutions for the challenges facing the scientific community. We are also dedicated to providing the highest level of service to our valued customers. For more information, visit us at www.argos-tech.com.
