

**CRYOKING
COMPLETE AND SYSTEMATIC SOLUTION FOR BIOBANKING
SAFER, MORE ADVANCED, HIGHER EFFICIENT**

CryoKING, a biobanking brand of Biologix, offers a comprehensive array of biobanking products, including kinds of cryogenic vials, general freezer boxes and racks, scanners, scanner guns, related software; biobanking management software, and more. CryoKING puts forwards the innovative concepts of “One Inch Revolution” and multiple barcodes prevail. CryoKING products feature professional design and advanced concepts, and are safe and efficient. Their standardization, formalization and digitalization all comply with international standards. The CryoKING system is the leader and complete solution provider in the biorepository kingdom.

1. CryoKING Crown Biobanking Management Software

CryoKING Crown Biobanking Management Software integrates everything from sample management and storage to packaging and transport into one comprehensive management program. It is the tool of choice for streamlined scientific research and biobanking management.

Advantages:

-Browser/Server Structure

Set up on server, clients can freely access with browser

-Visual Effective Operation Interface

Each storage unit can be easily found, which will convenient the operation

-Simple and Easy Function

-Optional Data Storage Solution

Public cloud, private cloud and private server

-Deep Integration of Hardware or Software

-Professional Service and Support

-Excellent Cost-Effective

2. CryoKING Multi Coding Identification and One-Inch Revolution

Multi Coding

SCAN INDIVIDUAL VIAL

SCAN ENTIRE FREEZER BOX OF VIALS

What is “Multi Coding”?

Bottom 2D barcode, side barcode and human readable numbers are all applied on the same vial to realize the identification of samples in multi ways.

Why we need “Multi Coding”

The problems such as label missing, preset barcode damaging, cause data missing and incalculable loss to science research.

What are the advantages of “Multi Coding”?

Multi Coding Identification effectively reduces the sample damage caused by label missing or barcode damaging, and offers different choices to meet different needs of the laboratory situation. CryoKING “Multi Coding Identification” makes research work more secure, efficient and convenient.

One Inch Revolution

Double your sample storage **with half of the space and cost, 34032 extra samples** can be stored per freezer. More capacity brings you more efficient storage.

Since 2011, CryoKING® Entered the emerging global market, Leading a new revolution in Biobanking solution field, Recognition and reputation from both distributors and users, Established global sales network, Serving and supporting research institutions and labs worldwide.
