

## PRESS RELEASE

### FOR IMMEDIATE RELEASE

Intelligent Weighing Technology will be at Pittcon 2017 from 5th-9th March to provide you with all the information you need connected to moisture determination balances and associated consumables.

### **Moisture Determination Balances for the loss-on-drying (LOD) technique**

Intelligent Weighing Technology provide a number of different moisture determination balances suitable for assessing the moisture content of a diverse range of samples. By weighing solid and liquid samples before, and during the drying process, such balances are able to provide a precise measure of moisture or solid content for applications as diverse as foods, plastics and building materials.

**Intelligent Weighing Technology can provide a moisture determination balance for every need.**

For the most demanding high-end moisture analyses the Precisa line, illustrating the accuracy the Swiss are famous, sets new

standards. Their EM 120-HR can provide 0.0001g weight readability and an impressive 0.001% moisture measurement. It also offers three heater options with a full graphic user interface that is customisable to make operation even easier.

The Intelligent-Lab™ produce moisture determination balances eminently suited for entry level operation with the IL-50 0.001 g and 0.01 g models. The new IL-TS-50 introduces a new level of simplicity of operation with touch screen control

### **Intelligent Weighing Technology is more than a distributor**

With 65 years' experience in the weighing and measurement business, both in the USA and worldwide the Intelligent Weighing Technology leadership team knows what their customers require. They appreciate that choosing the right moisture determination balance for your facility is not necessarily easy,

which is why Intelligent Weighing Technology have their own analytical chemist. They are there to test and recommend exactly what moisture balance, temperatures and times are best for your application.

And because moisture balance operational costs have sometimes been viewed as prohibitive, Intelligent Weighing Technology supply Intelligent-Lab's range of consumables, including Pure Sample™ aluminium pans and glass fibre pads, which can save you thousand of dollars a year.

### **Contact**

Intelligent Weighing Technology's experienced staff will be at booth 1544 and will be delighted to answer any enquires you may have about the moisture determination balances that they will be exhibiting.
