See Renishaw's new ultra-fast Centrus CCD detector at Pittcon

Renishaw is launching its new CCD detector at Pittcon on booth 5217. Centrus, with Rapide technology, has been engineered exclusively for high speed Raman analysis. It is now available on the inVia range of microscopes, as well as the RA802 Pharmaceutical Analyser.

With outstanding performance, even at speeds of over 1800 spectra per second, it dramatically reduces measurement times.

See a demonstration of Centrus at Pittcon on booth 5217.

About Renishaw

Renishaw is one of the world's leading engineering and scientific technology companies, with expertise in precision measurement and healthcare. The company supplies products and services used in applications as diverse as jet engine and wind turbine manufacture, through to dentistry and brain surgery. It is also a world leader in the field of additive manufacturing (also referred to as 3D printing), where it is the only UK business that designs and makes industrial machines which 'print' parts from metal powder.

The Renishaw Group currently has more than 70 offices in 35 countries, with over 4,000 employees, of which 2,700 people are employed within the UK. The majority of the company's R&D and manufacturing is carried out in the UK and for the year ended June 2016 Renishaw achieved sales of £436.6 million of which 95% was due to exports. The company's largest markets are the China, USA, Germany and Japan.

The Company's success has been recognised with numerous international awards, including eighteen Queen's Awards recognising achievements in technology, export and innovation. Renishaw received a Queen's Award for Enterprise 2014, in the Innovations category, for the continuous development of the inVia confocal Raman microscope. For more information, visit www.renishaw.com
