

Adam Equipment to Introduce Two New Lab Balance Lines During Pittcon 2018

New ranges of semi-micro, analytical, and precision balances will be on display at booth 1937

Oxford, Conn., Feb. 22, 2018 — Adam Equipment, a leading provider of professional balances worldwide, will exhibit a selection of lab balances, scales and accessories at booth #1937 during Pittcon from Feb. 26-Mar.1, 2018 at the Orange County Convention Center in Orlando.

At the show, Adam will unveil two new balance lines — the Equinox series and the Solis series of balances. Both balance lines include models that deliver two to five places of readability, bringing remarkable precision and valuable features to labs that perform highly detailed testing.

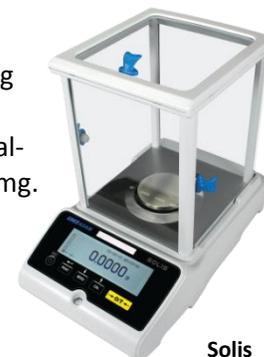

Equinox

Versatile and resilient, the [Equinox](#) is ideal for research and quality assurance labs; science education; or any application requiring exceptionally precise results. Precision models offer capacities from 360g to 8,200g and readabilities of 1mg and 0.01g. Semi-micro models have capacities up to 220g with 0.01mg readability. Analytical models feature capacities from 120g to 510g and 0.1mg readability.

A color touchscreen display provides intuitive operation, with icon-driven menus and readily accessible applications and functions. The five-inch screen is generously sized, offering 800 X 480 pixel resolution for excellent visibility. The Equinox is designed with a formulation/recipe function and a 3,000-item database, allowing users to store and recall ingredients, sample weights and check weight limits.

With a high-resolution graphic display and intuitive features, [Solis](#) balances provide an outstanding solution for a variety of lab applications. Featuring a broad selection of models, the Solis series offers capacities ranging from 120g to 8,200g with readabilities of 0.1mg, 1mg and 0.01g. Two dual-range, semi-micro analytical models feature capacities of 120g and 220g and a readability of 0.01mg.

Simple to use, the Solis keypad features easy-to-read buttons and helpful navigation arrows for uncomplicated operation. Formulation is simplified, as the Solis stores up to 99 ingredients, while memory accumulation totals results.

Solis

Adam products are popular in a variety of labs including product research and development, food testing, forensic analysis, and pharmaceutical production. During the show, Adam also will spotlight analytical and precision balances, top-loading balances, moisture analyzers, plus an anti-vibration table and other accessories.

This marks Adam Equipment's 19th year as a participant in Pittcon, the world's largest annual conference and exposition for laboratory science. To make an appointment to meet with Adam representatives at Pittcon, email us at sales@adamequipment.com.

About Adam Equipment

For more than 45 years, Adam Equipment has designed and manufactured precision balances and scales for professionals worldwide in the laboratory, medical, education, industrial, food, animal/veterinary and jewelry markets. Adam is committed to offering an extensive selection of weighing equipment with best-in-class value. Headquartered in the United Kingdom, the company has strategically established offices in the United States, South Africa, Australia, China and Germany to provide product support and speedy delivery to distributors.
