

## LabVantage Highlights Packaged LIMS Solutions Tailored to Meet Users Needs at Pittcon

### ***Purpose-built, flexible LIMS solutions save time and money for pharma, food & beverage, oil & gas, and diagnostics***

**Somerset, NJ—February 27, 2018**—LabVantage Solutions, the leading provider of laboratory informatics solutions and services, provides packaged LIMS solutions that allow labs to go live faster and at a lower cost than using a traditional implementation approach. LabVantage packaged solutions bundle industry specific software along with unique features tailored to meet the specific needs of customers working in the pharmaceutical, food & beverage, oil & gas, and diagnostics industries. LabVantage customers save as much as 85% of the implementation costs compared to a standard approach. LabVantage will present its LIMS packaged solutions at Pittcon 2018, February 26-March 1, in Orlando, FL.

All LabVantage LIMS systems share certain core configurations needed by most labs. A LIMS packaged solution goes beyond that by acting as an “accelerator” with additional industry-specific functionalities that can enhance the ease of use, adaptability, and flexibility of the system for use in a specific industry sector. At a minimum, these accelerators include user requirement documentation, a pre-configured LIMS that meets a target lab's business needs, and a set of packaged services and training to deploy the LIMS quickly and at a lower cost. Some of the packaged solutions also include additional deliverables, including industry-specific master data and fully executed validation documentation.

Each packaged solution is pre-configured to meet its targeted industry needs. The following are a few key features of each industry-targeted package:

- LabVantage Pharma
  - Intended for highly regulated labs that require validation based on GAMP 5
  - Provides complete pre-executed validation to match the delivered LIMS
  - Includes USP master data method templates
- LabVantage Food & Beverage
  - Intended to automate full lifecycle of F&B QA/QC labs
  - Incubation testing
  - Microbial testing
  - Sample compositing
- LabVantage Oil & Gas
  - Intended for chemical and refining support labs
  - Safety data sheets

- Hazards handling
- Statistical control charts
- LabVantage Diagnostics
  - Intended for clinical and molecular diagnostic service testing labs
  - Diagnostic request processing
  - Pricing and invoicing
  - Medical Director diagnosis and sign-off

All LabVantage packaged solutions include software, services, and training delivered at a fixed price. Services include master data creation and site process mapping.

“We understand what you do, and our packaged solutions reflect that. Our customers have come to trust and appreciate this approach and have realized the cost, time, and risk benefits of a pre-configured, industry-tailored LIMS,” says Ram Velidi, President at LabVantage Solutions. "Whether you are working in pharma, food & beverage, oil & gas, or diagnostics, we deliver solutions that solve your needs. Scientists and lab managers understand the value and importance of an enterprise LIMS system with optimized functionality. LabVantage packaged solutions are an economical, smart choice that can reduce risk, costs, and implementation time."

### **About LabVantage Solutions**

LabVantage Solutions, Inc., the leading global laboratory informatics provider, is headquartered in Somerset, NJ and has offices around the world. Their industry-leading solutions and world-class services are the result of 35+ years of experience in laboratory informatics. LabVantage offers a comprehensive portfolio of products and services that enable companies to innovate faster in the R&D cycle, improve manufactured product quality, achieve accurate recordkeeping and comply with regulatory requirements. LabVantage is a highly configurable, web-based LIMS that powers hundreds of laboratories globally, large and small. Built on a platform that is widely recognized as the best in the industry, LabVantage can support hundreds of concurrent users as well as interface with instruments and other enterprise systems. It is the best choice for industries ranging from pharmaceuticals and consumer goods to molecular diagnostics and bio banking. LabVantage domain experts advise customers on best practices and maximize their ROIs by optimizing LIMS implementation with a rapid and successful deployment.
