

# Adam Equipment to Exhibit Touchscreen Semi-Micro Balances During Pittcon

*Brand-new range of analytical and precision lab balances will be unveiled at booth 2454*

Oxford, Conn., Mar. 12, 2019 — Adam Equipment, a leading provider of professional balances worldwide, will present lab balances, scales and accessories at booth #2454 at Pittcon from March 17-21 at the Pennsylvania Convention Center in Philadelphia.

During the show, Adam will spotlight Equinox and Solis balances. Both balance lines include models that deliver two to five places of readability, bringing remarkable precision and valuable features to labs that perform highly detailed testing.

Also on display at the booth will be [moisture analyzers](#), and the [NTEP-approved Highland portable precision balance](#), ideal for use in the cannabis industry. Adam Equipment will also be previewing a brand new range of analytical and precision lab balances at the exhibition. [Contact us](#) to make an appointment to see the new range of balances.

[Equinox](#) is ideal for research and quality assurance labs, science education, or any application needing exceptionally precise results. Semi-micro models have capacities up to 220g with 0.01mg readability. Analytical models feature capacities from 120g to 510g and 0.1mg readability, and precision models offer capacities from 360g to 8,200g and readabilities of 1mg and 0.01g.

A color touchscreen display provides intuitive operation, with icon-driven menus and readily accessible applications and functions. The five-inch screen is generously sized, offering 800 X 480 pixel resolution for excellent visibility. Users can customize the display by choosing one of five color presets to change the appearance of the buttons, and can also select black or white for the display background.

With a high-resolution graphic display and numerous built-in functions, [Solis](#) analytical, milligram and precision balances provide an outstanding solution for complex lab tasks. Available in a wide selection of models, the Solis series offers capacities ranging from 120g to 8,200g with readabilities of 0.1mg, 1mg and 0.01g. Dual-range, semi-micro analytical models boast capacities of 120g and 220g and a readability of 0.01mg.

Users can readily view information on the amply sized display, which features multilingual capability to facilitate use in various regions. Quickly check remaining balance capacity on the tracker located prominently on the left side of the display.

Adam products are popular in a variety of labs including product research and development, food testing, forensic analysis, and pharmaceutical production. This marks Adam Equipment's 20th year as a participant in Pittcon, the world's largest annual conference and exposition for laboratory science.
