29st Annual Faraday Lecture, 2016 **sponsored by the Society for Analytical Chemists of Pittsburgh** **and the Spectroscopy Society of Pittsburgh**

To: Area Middle and High School Science Teachers. Please share this announcement with other science teachers or gifted facilitators in your school district as the Faraday Lecture Committee would like to have as many students as possible participate in the Lectures for the two days.

In the first half of the nineteenth century in London, the great English scientist, Michael Faraday, did the pioneering work that established the foundation for much of what we know today about the physics and chemistry of electricity. Faraday also loved to share his enthusiasm for doing science with others, and one way he did this was to give lecture-demonstration programs for young students.

You and your students (see the paragraph following this one for performance/grade scheduling) are cordially invited to attend the twenty-eighth annual SACP/SSP Faraday Lecture for Students. The lecture/demonstration, which will be entertaining as well as educational, will be held on **Tuesday, November 15 from 11:00 am until about 12:30 pm and on Wednesday, November 16 from 10:15 am to 11:45 am at Soldiers and Sailor Memorial Hall** near the University of Pittsburgh campus in Oakland. This year's lecture will be presented by Dr. Lee Marek of University of Illinois at Chicago. His title is *Weird Science on Energy and Fuel*. The doors will open forty-five minutes in advance.

The Wednesday Lecture will be for only 9-12 grade students with a limit of 36 students per school. For the Tuesday Lecture middle schools (grades 7-8) can still request up to 100 tickets and high schools (grades 9-12) can request up to 50 tickets.

Additional tickets may be requested for either day and will be distributed as available. Please return your ticket reservation request postmarked by **Friday, September 30, 2016** to Doris Zimmerman, 1390 Waverly Dr. NW, Warren, Ohio 44483-1718 or by e-mail to zimdoris@aol.com. Confirmations will be sent to e-mail requests. Requests received after the cut-off date will be subject to availability. If you have any questions, contact Doris Zimmerman at 330-847-2284, 330-219-0850 or zimdoris@aol.com. On your request sheet, please only request the number of tickets that you will actually need within 2 or 3 tickets. Our goal is to have as many students as possible attend the Faraday Lecture. If you are a high school teacher and are available to attend either day, please state this. I will be assigning tickets after the deadline and you should receive your tickets by the end of October. Please understand, this is a large undertaking, so be as specific as possible. Thank you very much, in advance.

The lecture/demonstration will be repeated on Tuesday evening, November 15, 2016, at 7:30 PM for members of the two sponsoring societies, their guests, and the general public. If you and/or your students are unable to attend either of the morning Lectures, you are welcome to come to the evening one. No tickets are required for the evening presentation, but please complete and return the form for this performance so we know how many individuals to expect.

Note: Tentative dates for the 2017 lectures are Tuesday and Wednesday, November 14 and 15, 2017.
