FOR IMMEDIATE USE

Cole-Parmer Showcases the Latest IoT with LIVE cloud-enabled products in booth #3125

Vernon Hills, IL—Cole-Parmer is helping customers save hours of time in the laboratory and out in the field with its IoT. The company offers secure and reliable Traceable® data loggers, Jenway® spectrophotometers and Masterflex® peristaltic pumps compatible with a cloud-enabled service on certain models. These systems provide a secure cloud connection using proprietary LIVE implementation, ensuring that research and day-to-day work is well protected. Stop by Cole-Parmer’s booth #3125 at Pittcon, March 3 to 5, 2020 at McCormick Place, Chicago to see these latest products and talk with experts about how to implement IoT into a lab or process.

**TraceableLive®**

Constantly monitor temperature, humidity, liquid nitrogen, CO2, and barometric pressure with a variety of TraceableLive wireless technology sensors, loggers, and other cloud-monitoring devices. This technology is suitable for monitoring critical environments and receiving on-time alerts to any temperature changes. TraceableLive securely connects to data via Wi-Fi on a smartphone, tablet, or PC. The cloud-based interface requires no additional software and connecting is simple and easy with a low-cost TraceableLive subscription; some products have free subscriptions. The TraceableLive subscription adds 21 CFR Part 11 compliance and is appropriate for laboratories working under strict regulations.

**CPLive™**

Access lab results and protocols with a simple touch of a button using CPLive cloud-enabled Jenway 74 single-beam and 76 split-beam spectrophotometers. Safely and securely upload and archive data to the cloud; manage multiple devices simultaneously through the CPLive app on a computer, tablet, or smartphone; share data with colleagues; and access unlimited data storage. CPLive data is date- and time-stamped, encrypted, stored, and backed up 24/7.

**MasterflexLive®**

Remotely control and monitor select Masterflex L/S® and I/P® pumps equipped with MasterflexLive; a secure, cloud-based platform. The pumps monitor and adjust critical processes running 24/7 from anywhere. This smart technology, a first-of-its-kind for peristaltic pumps, provides real-time control of all pump parameters including speed, flow rate and dispense volume. Alerts for operating conditions
and error messages are provided via push notifications, SMS and e-mail. The premium MasterflexLive subscription option adds 21 CFR Part 11 and EU Annex 11 compliance. This provides extra assurance to laboratories working under strict regulations that data in the cloud is secure and that labs meet all standard requirements.

Cole-Parmer is a leading global manufacturer of Fluid Handling, Test & Measurement and Biosciences products, instrumentation, equipment and supplies. We are proven experts in the fields of temperature measurement, spectroscopy, fluid handling, sample preparation & handling and chromatography. Our products & instruments are used extensively in the industrial, pharmaceutical, life sciences, environmental and food & beverage industries. Our portfolio of unique industry-leading brands includes Environmental Express®, Zefon, Oakton®, Traceable®, Jenway®, Kinesis®, TELOS®, Stuart®, PCRmax®, PolarSafe®, Techne®, VapLock™, Masterflex®, and Masterflex Ismatec®. We also partner with a number of key suppliers with industry-leading products.

Cole-Parmer is globally renowned for highly responsive customer service and experienced Technical Support Representatives providing exceptional technical support. Pipette Service and Calibration and Instrument Service facilities are also available in our North American and European locations.
