

SCIENCE: NOW MORE THAN EVER

Simply put, this new era in which we are living requires scientific innovation. The collaborative, inspiring, enriching environment Pittcon provides is crucial, now, more than ever.

Through Pittcon, your research, your knowledge, and your ideas are sharpened and made available to the scientific community working to find cures for the maladies of our modern age.

It takes a simple spark – a change in perspective, the introduction of a new idea – to begin a reaction that leads to a new discovery or a breakthrough in research. Let Pittcon be your catalyst to a world of collaborative science.

Pittcon, the world's leading conference and exposition on analytical chemistry and scientific instrumentation, is collaborating virtually from Monday, March 8 to Friday, March 12, 2021.

We have adapted Pittcon to the times. We want to make certain our participants – the very people who comprise the international science community – have access to the same dynamic exposition and technical programming we have provided for decades.

Our aim is to present the same scientific, interactive, collaborative Pittcon environment, reengineered to embrace the contemporary and reconditioned to engage our participants throughout the world.

Examine cutting-edge laboratory instrumentation, access the latest research, network with like-minded individuals, and explore job opportunities all within an innovative virtual platform, all from the comfort of your home, office, or laboratory.

ABOUT PITTCON

Pittcon is a dynamic, transnational exposition and comprehensive technical conference, a venue for examining the latest advances in research and scientific instrumentation, and a platform for continuing education and career-enhancing opportunity.

Our goal is to advance scientific endeavor through collaboration, bringing together a world of knowledge to impact, enrich, and inspire the future of science. Pittcon is a catalyst for the exchange of information, a showcase of the latest advances in laboratory science, and a venue for international connectivity.

Technical Program

Sunday, March 8 – Wednesday, March 12

Exposition

Monday, March 8 – Wednesday, March 10

Short Courses

Saturday, March 1 – Wednesday, March 19

WHAT TO EXPECT

Exposition

Pittcon's transnational exposition gives you the opportunity to see the latest laboratory instrumentation, participate in demonstrations and product seminars, talk directly with technical experts, and find solutions to all your laboratory challenges.

Technical Program

One of the foremost analytical chemistry conferences, Pittcon's technical program provides participants with direct access to the latest research and developments from top scientists and innovators found throughout the world.

Short Courses

With over 60 from which to choose, these courses cover significant topics in bioanalytics, cannabis, energy, enviroscience, food science, forensics, industry, life sciences, nanotechnology, materials science, pharmaceuticals, and many more.

Networking Sessions

These connectivity sessions provide a unique opportunity for attendees to meet other professionals with similar interests and backgrounds, working together to find solutions to a problem or collaborating to create novel laboratory approaches.

Employment Bureau

The Pittcon Employment Bureau provides a searchable database for registered candidates and employers, and then facilitates virtual interviews with qualified candidate matches during Pittcon at the request of those employers.

PEOPLE & PRICING

Pittcon is for anyone who develops, buys, or sells laboratory equipment, performs physical or chemical analyses, develops analysis methods, or manages these scientists.

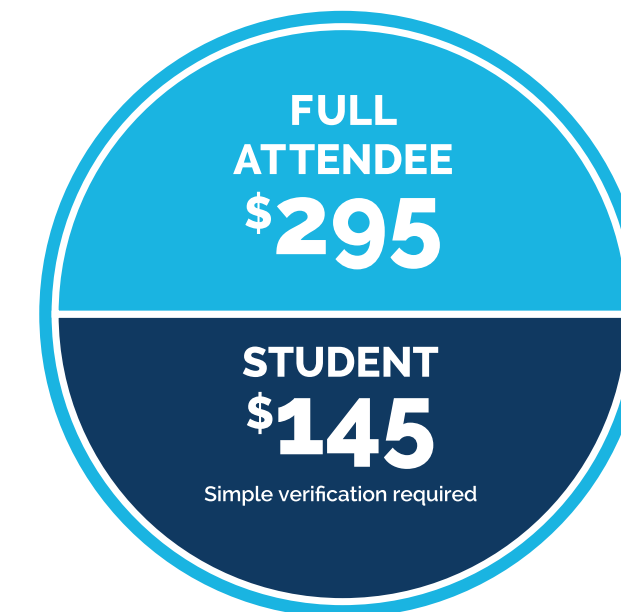

Sectors Served*

- Bioanalytics
- Cannabis & Hemp
- Energy
- Environmental
- Food Science & Agriculture
- Forensics & Toxicology
- Industry & Manufacturing
- Life Sciences
- Nanotechnology & Materials Science
- Pharmaceutical

Scientific Disciplines

- Spectroscopy
- Chromatography
- Spectrometry
- Electrochemistry
- Microfluidics
- Laboratory Automation
- Informatics
- Sensors
- Microscopy
- Physical Measurements

*Includes macrosectors such as government, academia, and private/public business and research.

Did You Know? Your registration fee helps fund science education and outreach. pittcon.org/register

It's our mission, it's part of who we are – Pittcon donates approximately one million dollars annually to support various science education and outreach activities, including scholarships and internships, educator and scientific achievement awards, equipment grants, research grants, and grants to public science centers, libraries, and museums.
